OBJECTIVE

A front-end web developer, experienced with JavaScript, learning React, also knows Python, Flask, OpenCV, and a Robotics enthusiast, experienced working with Arduino programming language, loves working as a team, prefers collaboration over competition.

EDUCATION

IT Undergraduate | Muffakham Jah College of Engineering and Technology
DECEMBER 2020 - Present
CGPA: 8.7

SKILLS

- React, JavaScript, HTML, CSS
- Python - OpenCV, Flask
- Arduino programming

PROJECTS

Prioritize Future
An implementation of Eisenhower matrix, which is an important concept in Time management. Build the interface using **JavaScript, HTML, CSS and Local web storage**. It is deployed on netlify with a custom domain name.
Project URL: https://prioritizefuture.com

Student Feedback form
A project focusing on conversion of paper feedback into an online form. It is mainly focusing to keep the anonymity of the student.
This project is still in development stage.

EXPERIENCE

Team Full Stack Development member at T-SIG MJCET

JAN 2022 -- PRESENT

--> Conducted PyWeek workshop - a 7 days workshop discussing different aspects of Python, I was speaker on Day-6, topic was Flask web framework.

--> Speaker at web development workshop, explained concepts of HTML, CSS and of JavaScript.

Junior Researcher at Team Robocon MJCET

JAN 2021 -- NOV 2021

--> Participated in Robocon 2021 - a national Robotics competition, with my team and worked with different aspects of robotics like Electronic motors, sensors and in Software Arduino programming and ROS(Robot operating system)
